

Name Art

Showing 1 Point and Aspherical Perspective

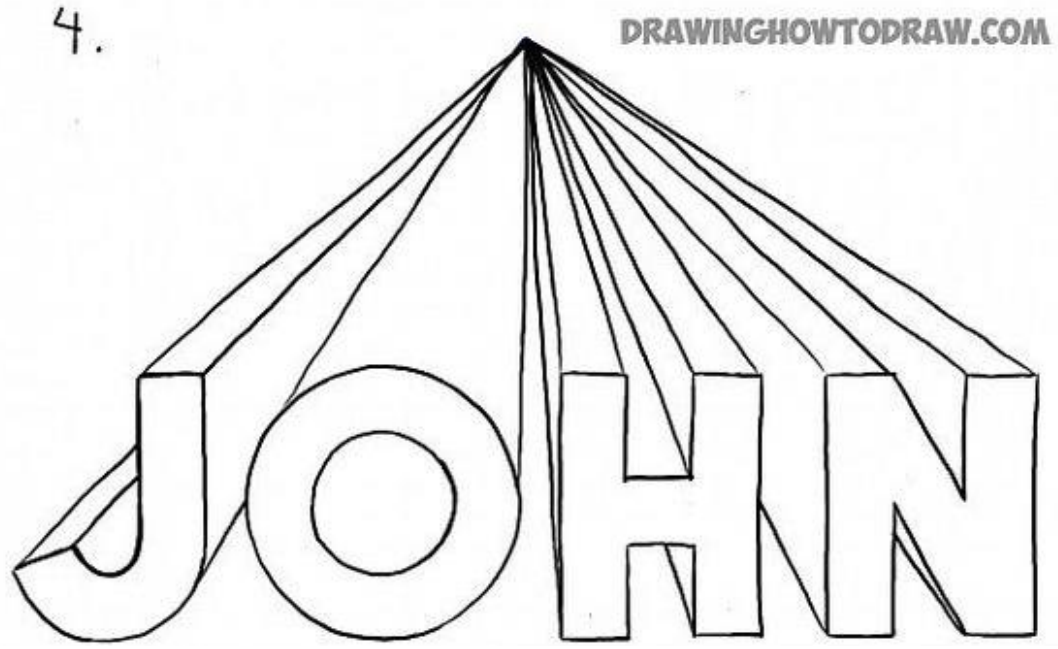

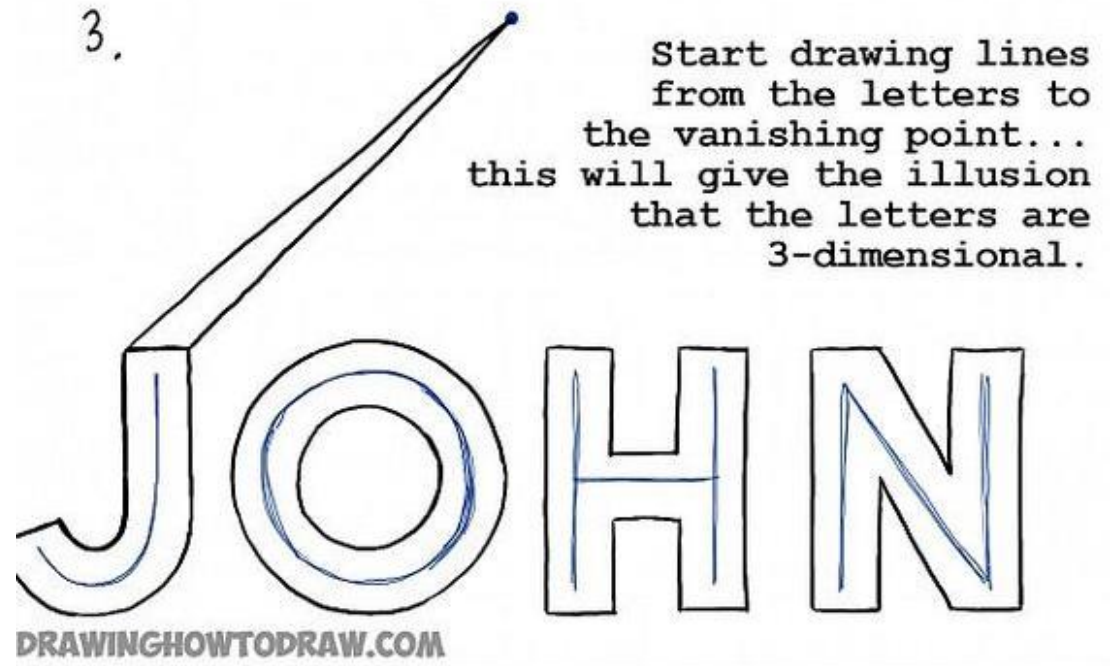

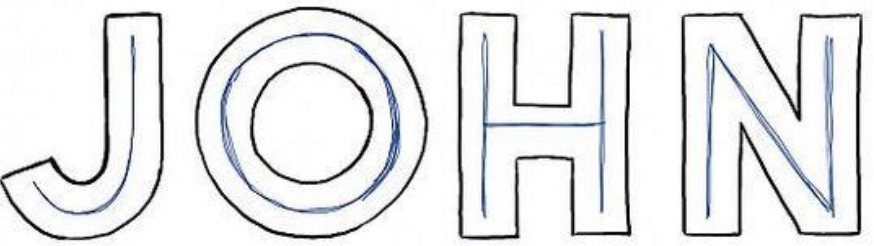

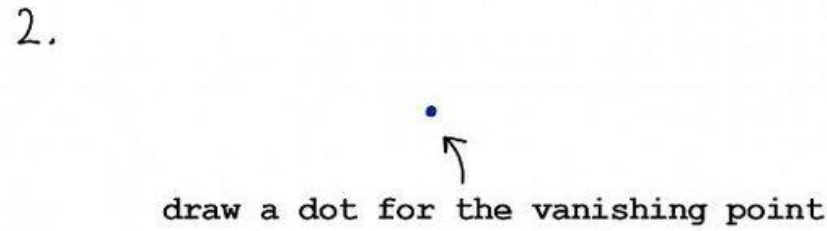

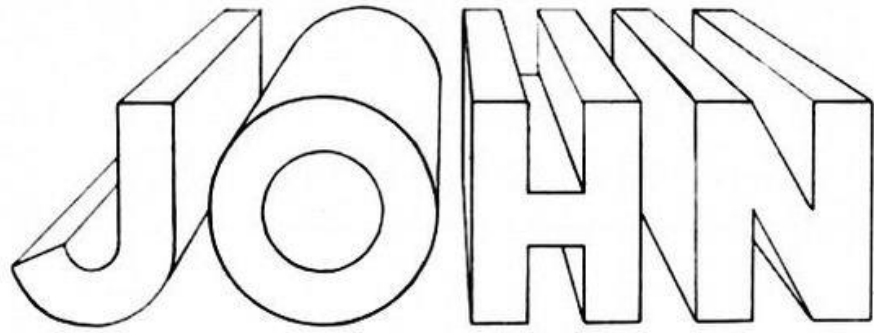

-A nod to the Renaissance-

Directions:

- Start with a vanishing point and arrange the letters of your name around it in the manor of your choice.
- Make your letters into block letters. See Slide 3.
- Take the appropriate corners of your letters to the vanishing point. If a line crosses through a letter, do not draw that line.
- Color your name design using patters of your choice or use your letters to draw fun clues about you or your personality within them.
- Color the space going back to the vanishing point to model aspherical perspective. Colors should be bold close to the letters and fade-getting lighter, bluer, and grayer as they go back to the vanishing point.

DRAWING 3D LETTERS IN ONE POINT PERSPECTIVE
